career
counseling
18-19

Organized by : Department of Training & Placements
Name of the Speaker : MR. SK. SUBHANI & K. ASHOK
Designation : STUDENT COUNCELLORS, Vijayanagaram
Topic : platform to technical students for right exposure.
Venue : NEW GEN IEDC HALL, BLOCK-A.
Date & Time : 28-2-2019, 10:00 to 12:15p.m

Branch(s)	Year(s)	Semester	No of Students Attended
ECE	I, II & III Years	I	224
EEE			198
Mech			100
Civil			98
CSE			180
Total No of Students Attended			800

Report in brief: Mr SK. SUBHANI

Report in brief: Mr.SK. SUBHANI has interacted with the students of I, II&III years on platform to technical students for right exposure. Engineering has always been the go-to career for students who are into the technical and rational side of things. Every year thousands of students in India become engineers, and the trend is only growing rapidly. One of the primary reasons why students must have industry exposure is to lay a professional foundation of their core subject. It is, therefore, important to choose universities who emphasize on mentoring students into professionals. As engineering graduates only get a deeper insight of their syllabus, it is imperative for them to work on live projects. A student must learn the practical side of things and the etiquette in a professional environment. Industry exposure allows a student to apply the technical knowledge to real-life situations and problems. The industrial training is an experience where a student closely works with other professionals and follows the instruction to get insights about the operations. It finally allows students to be coached by their mentors while on industrial training. Industrial exposure allows an engineering graduate to develop several necessary skills for a successful engineering career. It allows students to understand communication across verticals and improve their understanding of effective communication.

Report in brief: The representatives spoke that the problem-solving skills are traits that enable you to do that. While problem-solving skills are valued by employers, they are also highly useful in other areas of life like relationship building and day-to-day decision making. Problem-solving skills help you determine the source of a problem and find an effective solution. They illustrated how to improve our problem-solving skills
Students interacted with them and understood the benefits of attaining the skills

Report in brief: Local bodies like panchayats, municipalities and corporations are people oriented in terms of the work. Engineering graduates have the responsibility of innovating for the community they live in especially for the ground level bodies. She spoke that local students understand the ground level problems and will be the best minds to solve them or come up with innovative platforms like mobile apps and web pages to ease the problems the community faces. Students responded to her with the initiatives they have previously taken which she appreciated.

The program concluded by extending Ms.Sajitha a big round of applause for the direction she gave to the students related to their innovativeness.

Civil			105
CSE			140
Total No of Students Attended			791

Report in brief: Mr. CHARAN KUMAR interacted with all the B.TECH students about the importance of "PROFESSIONAL NETWORKING". He said that Networking is a deliberate activity to build, reinforce and maintain relationships of trust with other people to further your goals. Professional networking is simply networking focused on professional goals. A very important part of professional networking is that it is about building relationships and trust, not just swapping business cards. For successful networking to take place a real relationship needs to be built. Professional networking has become a topic of great interest as business interests and networks become ever more international which require access to information on a level that random and close acquaintances cannot provide. The outcome from professional networking can be:

Job offers, Additional sales, Access to talent for recruitment

Offers as speaker, trainer etc for a fee or for free as further promotion

Insights into how things 'really work' inside other organizations or fields of business.

Higher social status and access to social events inside and outside the business sphere.

He also stated that "Networks deliver three unique advantages: private information, access to diverse skill sets, and power. Executives see these advantages at work every day, but might not pause to consider how their networks regulate them," The program concluded by extending Mr. CHARAN a big round of applause for sharing and guiding the students

Total No of Students Attended			122

Report in brief: Mr. Rishi Kumar and Mr. Vinay Babu spoke that Peer Interaction is an essential skill that architects require. The word "peer" in the context of this capability, refers to any individual who has a contribution to make to the success of the project, regardless of the organization, role and responsibility. In a typical workday, the architect needs to interact with a number of peers. A successful architect would need to build upon his interaction skills, as the role demands a high level of interaction with peers and other stakeholders. Mobile computers are now increasingly applied to facilitate face-to-face collaborative learning. However, the factors affecting face-to-face peer interactions are complex as they involve rich communication media.

Report in brief: Mr.Ganesh explained the purpose of project management that it is to foresee or predict as many dangers and problems as possible; and to plan, organise and control activities so that the project is completed as successfully as possible in spite of all the risks.

Mr. Ravindar, spoke about the Project-based learning (PBL). He said that it is a student-centered learning that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. Mr.Ravindra shared a few project ideas that their students are currently working on and even extended an invitation to the students to visit their campus to know more about the work.

Ms.Mouica from EEE has extended the vote of thanks on behalf of RCE.
